

Smart Volution's Tablet Cash Register completes integration with Miura Systems POSzle solution

Smart Volution today announced that it has completed the integration of its highly successful Tablet Cash Register (TCR) with Miura Systems recently launched POSzle solution. The combination brings a new level of functionality and flexibility at a competitive price point.

Today's educated retailers wishing to upgrade their legacy tills are looking for significant benefits from their POS solution. Retailers want the flexibility to work from a fixed point in the store or have mobile capability for payment check outs. They also want the POS solution to be as compact as possible whilst reinforcing the brand image of the store. The Miura POSzle solution creates flexibility in terms of third party hardware that can be utilised creating choice in terms of functionality and styling for the store.

"We are excited to expand our hardware support with the new POSzle from Miura. The cost effective solution enables retailers of any size to utilise the benefits and flexibility of a modern and innovative point of sale system", said Justin Coward, CEO of Smart Volution.

About Tablet Cash Register (www.tabletcashregister.com)

Tablet Cash Register (TCR) is a cost effective electronic point of sale (EPOS) running on a standard tablet computer for small and medium retailers. It allows smaller retailers to garner the same efficiencies EPOS provides large retailers at a price point they can afford. TCR is designed for simplicity. Smart Volution is a leader in mobile applications utilising wireless technology. The company develops cost effective retail applications which allows retailers to maximise their ROI from investing in new technology.
