

Register for Hospitality – Simple, Modern EPOS

Modern Electronic Point of Sale (EPOS) is not just about executing payment, managing inventory and keeping records. It's about business management and providing a point of customer service. Register by Smart Volution is an innovative, cost-effective and modern EPOS solution combined with enterprise class support. Designed for simplicity, the Plus edition of Register provides enhanced functionality to the hospitality market. Register provides operational efficiency to maximise “covers”, make reservations and reduce no shows. It allows small to medium-sized hospitality businesses to harness enterprise efficiencies at an affordable price point.

Move from a Point of Sale to a Point of Service

MANAGE & CONTROL

Register for Hospitality – Simple, Modern EPOS

1

John phones the restaurant to make a table booking. They look up his favourite table on the CRM and book him in on the Register Calendar. John receives a confirmation text. Two hours before the booking John receives another text reminder of his booking.

2

John arrives at the restaurant and goes to the bar. He orders a drink and a bar tab is opened for him on Register. One Pint of beer is deducted from the stock level of the barrel.

3

John's friend Jim arrives and they go to the table. John's bar tab is moved to "Table 6".

4

John and Jim order their food at the table. The food order is printed on a kitchen printer (via the Register) and prepared by the chef.

5

They finish their meal and ask to pay. The bill is £50, but John had more than Jim. John pays £30 and Jim pays £20 using split payment on Register.
