SMART VOLUTION AND BAMBORA TEAM UP TO SIMPLIFY EPOS AND ENHANCE PAYMENT PROCESSING FOR RETAILERS

Smart Volution is pleased to announce that it has integrated its Register EPOS solution with Bambora Connect, the e2e payment solution for tablet based cash registers and acquiring service. Bambora Connect is a full payment service including pre-certified payment terminals with class leading digital merchant on-boarding, simple pricing and pan-European scalability. Both Smart Volution and Bambora have a common ethos of optimising current technology to bring low cost, capability enriched solutions to the retail market place.

The lack of any legacy infrastructure allows both Smart Volution and Bambora to rapidly implement new solutions and hardware into their platforms.

With the integration of Smart Volution's Register EPOS, Bambora customers will have access to a comprehensive point of sale solution, which now embraces a fully functional MPOS running on mobile devices as an alternative to a tablet. As well as having the advantage of a truly competitive payment gateway, retailers who use the Register solution will have the benefit of a simple to use EPOS with full stock control and web-based back-end reporting.

Naturally, Register hooks up to all your favourite online ordering systems such as WooCommerce and Shopify to name but two, plus offers direct integration with eBay and Amazon Marketplace. To keep track of everything, Register also has an interface into QuickBooks and Sage as well as other major accounting packages

Justin Coward, CEO of Smart Volution, said *"We are delighted to integrate with Bambora as this extends our reach for potential Register customers. Bambora has a very appealing offer to retail customers and the inclusion of our Register solution can only enhance the proposition."*

Mark Roberts, Head of Bambora Connect at Bambora, said *"We are excited to have teamed up with Smart Volution's Register solution. We can see significant synergies to be gained by taking our joint proposition to market."*
