

Simple to use, cost effective EPOS

Maximise Profit • Simplicity • Peace of Mind • Save Time • Grow & Innovate • Stay Current

Maximise Retail Re-Opening with Register (COVID-19 and beyond)

The re-opening of retail is underway and over the next few weeks and months more retailers will be opening their doors again. Especially in the early stages there is likely to be a surge of activity with customers who have been waiting to get to that important item.

There are of course restrictions in terms of social distancing with one-way traffic through stores and limited customers in store at any one time. These restrictions could slow transaction throughput and hence revenue might be constrained. So, we need to maximise throughput given these limitations. One way to do this is to use Register Mobile to **open more lanes and queue bust.**

The Register EPOS (Electronic Point of Sale) software can be deployed rapidly and operates fully on cost-effective all-in-one EPOS hardware such as the PAX A920 and Sunmi P2 Pro.

Stop revenue walking out the door

The worst-case scenario is that a customer comes to your store and walks away due to the queue. That is literally your revenue walking out the door.

Just one device could mean **doubling your throughput and revenue whilst handling peak times better.**

Not just for COVID-19 but for future revenue

Beyond COVID-19 reducing walkaways is key to maximising revenue even if just for peak times.

Sell More

What difference would it make if you converted that missed opportunity of a **£25 sale per day?**

A single store over 360 days unlocks new revenue of **£9,000 per store**

What would this look like for your business?

REGISTER

Cost effective feature rich point of sale designed for simplicity

INTEGRATED CARD PAYMENTS

Faster transactions, remove errors and simplify end of day settlement

REPORT

Run reports on Cash / Card and products, online and on device

CASH MANAGEMENT

Record Cash payments and manage your float

Contact us to find out more about Register EPOS
