Unleash your EPOS with Register Mobile

Maximise Profit · Simplicity · Peace of Mind · Save Time · Grow & Innovate · Stay Current

Mobile Point of Sale (MPOS) is more than executing a mobile card payment. It's about taking your point of service with you. You can take card and cash payments, manage stock & customers, book appointments with text reminders, scan bar codes, centralised business reporting and much more. In fact, everything you know about our Register Core and Plus solution is available for mobile. Move from point of sale to a point of service whether its in-store or on the road with field based sales.

- Free staff to engage customers directly
- Reduce queues and store abandonment
- Increase the sales floor
- Provide concierge level service
- Accelerate Checkouts
- Expand capacity on demand
- Field based sales
- Works offline

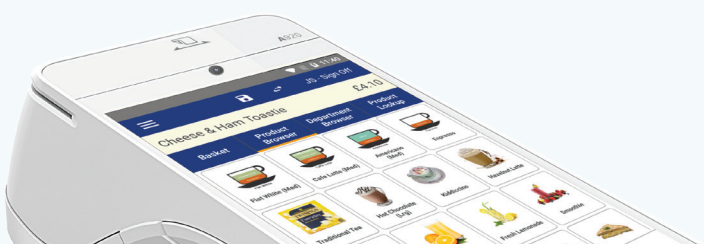

On the Road & Door to Door

If your business is mobile and you sell on the move, you can take your point of sale and service with you on Register Mobile. Manage stock, pricing, appointments, cash & card and work offline.

In-Store

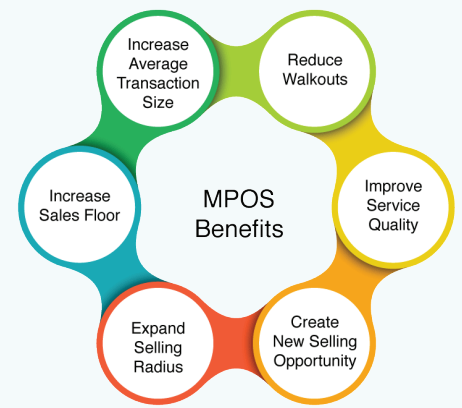

Free your clerks from behind the counter and let them engage and sell on the shop floor. Customers can check out anywhere whilst you cross and up sell. Clerks provide a direct concierge level service.

Why Register Mobile?

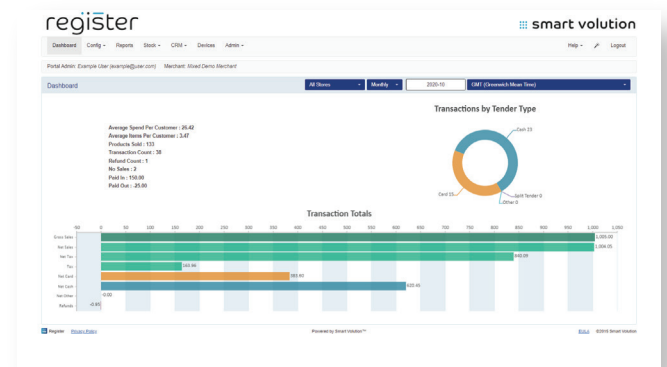

Register mobile provides full EPOS functionality in a mobile form factor. It is not a cut down version or a connection required web based application. Register mobile is a local native Android application that is feature rich, enterprise class, performant and supports multiple hardware and payment options. Register does not require an internet connection to operate, it sends and receives data when a connection is available. Register supports a mixed estate of fixed and mobile EPOS with a central portal for configuration and business reporting. You can use it fixed in-store in the week, and at an event at the weekend. You could start off mobile, and move to fixed if you open a store.

Save Lost Sales. What if you could eliminate **ONE** walkout per day or sell **ONE** more item by adding **ONE** mobile device per store? What difference would it make if you converted that missed opportunity to a £40 SALE? For a 200-store chain over 360 days mobility unlocks new revenue of **£2.9million** per year and **£14,400** per store.

The web portal allows you to centrally configure and set up your MPOS devices, import products and view or download your business reports.

- Supports a mixed estate of fixed and mobile
- Hybrid architecture, local and cloud data
- Real-time business reporting
- No local server required
- Centrally Managed
- Operates offline

Register is available in two formats, Register Core & Register Plus. Register Plus includes a Customer Relationship Management (CRM) module, calendar booking, appointment text reminders and hospitality functionality.

register lite
