Add EPOS to your
resale portfolio

Sell your own Branded Modern & Cost Effective EPOS Solution

EPOS is undergoing rapid evolution. Modern Android based hardware and software provides innovative EPOS solutions that can be accessed, configured and managed from anywhere. Extending beyond the Sale and into Service with customer relationship management, appointment booking and text reminders to reduce no shows. Augment your target market beyond retail and hospitality into the service industry such as salons, clinicians and health and beauty.

Gone are the days of clunky, expensive to purchase and manage PC based solutions with poor design and support. Merchants and customers expect more for less, don't get left behind and be part of the revolution. Resellers make margin on all aspects of the total solution with choice in hardware, payment and service.

Drive Revenue with a Total Solution

Register has been specifically designed to be sold via the channel and is not sold directly.

- Be Continuously Rewarded (SaaS)
- Modern & Easy to Use Software & Hardware
- Differentiate from your Competition
 - Make it your own
 - Value price
- Margin, Choice & Flexibility
 - Drive Margin on all components
- Financially supported customer Referrals
- Channel Focussed & we don't Compete
- Cast a Wider Sales net
- Operate Efficiently, Scale & Reduce Overhead
- Enterprise Support
- Continuous Innovation
- Rapidly Evolving market, be part of it

Many EPOS resellers marketing a similar subset of legacy EPOS solutions is driving prices and margin down. With Register you can utilise our marketing content and differentiate by creating your own offering to suit your market. Brand it as your own, choose from a selection of modern and cost-effective hardware, provide your own card payment, support and financial services.

EPOS hardware manufacturers have moved to Android in order to provide cost effective solutions. Register enables these products with innovative and modern software.

The market is changing; this is happening, and you can be part of it.
